

JUAREZ IMPORTS BOTTLED LIQUOR

Large Quantity of Whisky Passes From the U.S. To Mexico, Says Official.

More than the usual amount of intoxicating liquor is being passed in bulk from the United States to Juarez, it was stated by a government official Tuesday.

It was stated that during January there passed double the amount, as compared with other months since El Paso went dry.

Came From Kentucky.

A good deal of it is bottled whisky coming from Kentucky, it is said. The reason that many people in El Paso are viewing this condition with apprehension is the fact that bottle shipments sent into the town are out of proportion to the growth of the business, and would indicate that the bottles are either to be consumed in greater quantities in Juarez than in the past, or there will be an attempt to smuggle them back to the United States.

ANOTHER SUPER-FEATURE

Kitty Gordon Today At the Wigwam In the Feature, "Adele."

The Wigwam takes pleasure in announcing the engagement of "Adele" for today and tomorrow. This is another of those splendid super-features which the United Picture Theaters of America is putting out. Kitty Gordon, America's greatest star, has the leading role.

"Adele" is the picture of Adele Blenau's world famous book. It is described as being a "soul-stirring and compelling drama of a woman's great temptation" and it is said to offer the magnificent spectacle of a woman's opportunities for the display of her dramatic talent that she is a "super-revelation." If the picture is only half as good as the press agent's advance notices say it is then it is really a super-feature. After having seen the picture, the critic writes: "Kitty Gordon in 'The Light of Western Stars,' one is inclined to believe all the press agent says of the actress's production. In the United Picture Theaters of America is a comparatively new organization of the leading picture show exhibitors of the United States who have financed their own company and a buying pictures after their directors have actually seen them on the screen."
